

BHAVIK SHAH

Milpitas, CA | 562-608-6628 | bhavik.shah.1291@gmail.com | [LinkedIn](#)

SUMMARY

- **Senior Frontend Engineer** with **10+** years of experience architecting, building, and scaling large-scale **web applications** across security, healthcare, and e-commerce domains.
- Deep expertise in **JavaScript and TypeScript ecosystems, React, Angular, Next.js, Express.js**.
- Proven track record of **leading** end-to-end development initiatives, improving application performance, and delivering solutions that enhance revenue, operational efficiency, and user experience.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Java
- **Front-End Technologies:** React, Angular, Next.js, Redux, jQuery, AEM, D3.js, HTML5, CSS3, SASS/LESS, Bootstrap
- **Back-End Technologies:** Node.js, Express.js, Spring, REST, GraphQL
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Testing Framework:** Jasmine, Jest, Cypress, Protractor, K6
- **CI/CD & Version Control:** Jenkins, SonarQube, GitHub, Bitbucket, GitLab
- **Tools:** Splunk, Google Cloud Console, Postman, Lighthouse, JIRA, Asana, Figma

EXPERIENCE

Senior Frontend Developer, Fortinet, Sunnyvale, USA

Aug 2021 – Present

- **Architected, solely developed and delivered** multiple high-performance **TypeScript-based React applications** for **Fortinet**, driving qualified marketing leads and supporting data-driven RFP wins, including:
 - **Firewall ROI Calculator (Live):** Delivered the product using **React, Next.js (SSR)**, and **Tailwind CSS**, enabling customers to calculate real-time ROI, TCO, payback period, and recommended Fortinet firewall sizing. Engineered reusable UI components, modular calculation engines, and SSR performance optimizations.
 - **Product Carbon Footprint (PCF) Calculator (Live):** Delivered product-level carbon footprint insights to global users by building interactive data visualizations with **D3.js** and managing complex application state using **Redux Toolkit**. Improved performance by **45%** through dynamic imports and computation caching, and enhanced UI reliability by 30% through Redux-driven state architecture and optimized REST API integration.
 - **Firewall Upgrade Advisor (Live):** Allows clients to submit firewall details and receive tailored upgrade suggestions. Enhanced client-side data handling and state management, resulting in **40%** more accurate results.
 - **OT Evaluation (Live):** End-to-end solution enabling clients to submit assessments and instantly receive Fortinet-branded security scores. Improved load time by **35%** using React memoization and API batching, increased assessment completion by **25%** through streamlined input flows and reduced form validation errors by **30%**.
- **Led** the end-to-end redesign and development of entire Fortinet's marketing website (**Live**) in **HTML, CSS, JavaScript and JQuery**, revamping key pages including **Homepage**, Blog, Product & Solution, Labs, Cyber Glossary, and Press Releases. Delivered **pixel-perfect, ADA-compliant, cross-browser** compatible, and fully **responsive** UI based on **Figma** designs across desktop, tablet, and mobile using **CSS media queries**. Implemented reusable UI components and **multi-language support** to enable scalable content delivery across global regions.
- Implemented secure **SSO and session management**, strengthening authentication flows.

- Established unit, integration, and end-to-end testing using **Jest** and **Cypress** for React applications, improving release stability, reducing production regressions, and strengthening reliability within **Jenkins** CI/CD pipelines.
- Led **performance optimization** initiatives for Fortinet.com, reducing load times, improving Lighthouse scores, optimizing scripts and assets, applying **SEO best practices** and caching strategies.
- **Collaborated cross-functionally** with designers, backend engineers, PMs, and QA to define technical scope, resolve architectural issues, and deliver high-impact features under aggressive timelines.
- **Mentored junior and mid-level engineers** through code reviews, driving stronger code quality by linting code, architectural discussions, and best-practice guidance, raising engineering standards across the team.

Frontend Developer, Kaiser Permanente, Pleasanton, USA

Feb 2018 – Aug 2021

- Built **NextGen Dashboard** in **React with GraphQL** and **Ant Design**, enabling Kaiser staff to manage patient appointments, room assignments, and reduce wait times. Implemented department's dashboard which has **CRUD operations** on appointments, **real-time updates** using **WebSockets** and improved **room assignment** logic.
- Worked with **Node.js**, **Express**, **PostgreSQL** to develop backend services, implemented **end-to-end testing** with **Cypress**, **unit testing** with **Jasmine and Jest**, and **load testing** with **K6**; managed **CI/CD deployment** through **Jenkins**, proactive monitored **application logs and errors** using **Splunk** to improve system reliability.
- Developed a **Kaiser Health Plan Sales Application (Live)** by integrating **AEM** with **Angular 7**, building checkout flow, consumer and broker **dashboards**, implemented **session management**, **ACLs**, security protocols, and optimized AEM content **caching** strategies to improve load times and scalability.

Software Developer, Kohl's, Milpitas, USA

Jul 2017 – Jan 2018

- **Led** the migration of Kohl's E-Commerce Service Center from Oracle ATG to a **React** application, enabling agents to efficiently place orders on behalf of customers. Managed the full development lifecycle including architecture, implementation, testing, deployment, and post-launch optimization.
- Built scalable backend services using **Node.js and Express** and developed custom agent dashboards with role-based access control (**ACL**), improving operational efficiency, security, and data accessibility.

Front End Developer, American Express, Phoenix, USA

Jul 2016 – June 2017

- Developed **AMEX API portal (Live)**, integrating **React and Angular** under one platform, improving API interactions and reducing latency. Developed User management, Signup Flow, Login, Form Validation and Product module in **React**. Developed **Internal Dev Portal** from JSP to **Angular 2.0**, enhancing UI performance.

Software Developer, Hi Tek, India

June 2013 – Jul 2014

- Built scalable healthcare web applications, transitioning from traditional websites to **AngularJS**, implementing modular components, optimizing UI performance, and ensuring cross-browser compatibility.

EDUCATION

- **Master of Science in Computer Science** Aug 2014 - May 2016
California State University Long Beach, CA
- **Bachelor of Engineering in Computer Engineering** May 2013
University of Mumbai, India
